Professional Summary

Full Stack Developer with strong hands-on experience in building scalable, high-performance web applications. Skilled in designing modern user interfaces, architecting backend systems, and integrating secure payment workflows. Experienced in SaaS product development, real-time systems, and cloud deployment, with a focus on performance, scalability, and clean architecture.

Technical Skills

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MongoDB, MySQL, Sequelize ORM

DevOps & Tools: AWS (EC2, S3, SES, Amplify, Secrets Manager, Lambda Functions, RDS), Git, GitHub, Postman, JIRA, Agile/Scrum

Other: Stripe, Razorpay, Cashfree, Escrow Payment Systems

AI & Productivity Engineering

Leveraged AI tools like ChatGPT and GitHub Copilot for rapid prototyping, debugging, and code optimization.

Designed effective prompts to generate backend APIs, database schemas, and reusable frontend components.

Used AI-assisted workflows for documentation, test case generation, and edge-case handling.

Improved development efficiency by automating repetitive coding tasks and accelerating feature delivery.

Applied AI tools in real-world projects for faster problem-solving and decision-making.

Work Experience

Full Stack Developer – smartData Enterprises (Jan 2023 – Present)

- Spearheaded development of scalable SaaS applications using modern full stack technologies, ensuring high performance and reliability.
- Designed and developed modular, reusable frontend architectures using React.js and Next.js, improving maintainability and user experience.
- Built and optimized RESTful APIs and real-time features using Node.js, Express.js, and WebSockets.
- Architected secure authentication and authorization systems, including role-based access control and token-based security.
- Integrated multiple third-party services including payment gateways, notifications, and cloud storage solutions.
- Implemented cloud-native solutions using AWS services (EC2, S3, Lambda, RDS, SES), improving system scalability and availability.
- Collaborated in Agile/Scrum teams, contributing to sprint planning, code reviews, and continuous delivery pipelines.

Projects

PadelPro – Sports Booking & Management Platform

A comprehensive multi-role SaaS platform for sports clubs, enabling seamless management of bookings, tournaments, and user engagement.

Key Features:

- Complete booking system including court slot booking, tournaments, leagues, and dynamic scheduling.
- Social features including user profiles, posts, followers/following, and engagement tracking.
- Real-time notifications powered by Firebase.
- Advanced pricing logic based on time slots, availability, and demand.
- Multi-role system (Super Admin, Club Admin, Player) with granular access control.

Payment Integration:

- Integrated Stripe and Cashfree payment gateways.
- Implemented escrow-like payment workflows for secure transaction handling between users and clubs.

Tech Stack: React.js, Node.js, Express.js, MySQL, Sequelize ORM, AWS (EC2, S3), Firebase, JWT Authentication

Role:

- Led end-to-end system design and development.
- Developed booking engine, payment workflows, and backend architecture.
- Managed deployment and cloud infrastructure.

Transport Management System

A full-stack system designed to streamline logistics and transportation operations.

Key Features:

- Fleet and vehicle management with real-time tracking capabilities.
- Trip scheduling, route optimization, and driver allocation.
- Shipment tracking and status updates for operational transparency.
- Reporting and analytics dashboards for operational insights.

Tech Stack: React.js, Node.js, Express.js, MongoDB/MySQL, AWS

Role:

- Designed backend architecture and APIs for logistics workflows.
- Implemented tracking modules and operational dashboards.
- Ensured scalable and efficient data handling.

SafeSphere – https://safesphere.isafetylog.com/

- Implemented role-based access control and organization-level customization.
- Developed CSV-based onboarding and secure data handling systems.

Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, MySQL

Hartzell Helios – https://helios.signiaaerospace.com/

- Built secure document storage and retrieval systems.
- Implemented advanced search and categorization features.

Tech Stack: React.js, Node.js, Express.js, MongoDB, MySQL, AWS S3

Education

Master of Computer Applications – Birla Institute Of Applied Sciences (2021–2023)

Bachelor of Science – Kumaon University (2018–2021)

Languages

- English (Professional Proficiency)
- Hindi (Native)
